#### **■ SSC Project**

- Raising fund for the financially challenged students who have achieved excellent academic credentials in S.S.C. examination 2008.
- •We need your financial contribution to support these talented student.
- •We believe with a little support from all of us, they can flourish their talents and develop their full potential.
- •\$20 is enough to support the educational cost of a student for a month.
- •In 2007, with the generous financial support from a lot of kind hearted people staying in different parts of the world, we were able to help 43 students from 12 different districts to continue their college education.
- •With our small amount of financial support, these students have made wonderful academic progress over the last one year.

#### ■ School project

- Raising fund for the financially challenged students to pursue their education at Collectorate Public School and College, Nilphamari.
- Being a private school the tuition fee is high, that causes several brilliant students dropping from the school.
- •This drive is to support a number of students, who get scholarship at class five, in continuing their education at the same school.
- •We hope to support their partial monthly tuition fee from class six to class eight.

### ■ Math Olympiad

- To develop our beloved country, Bangladesh, we believe that one of the best ways is to invest in our people, specially helping students to think rationally.
- Mathematical problem solving is one key element to nourish the faculty of critical thinking.
- A person with good critical and rational thinking becomes an asset as opposed to a burden for a nation.
- Hridoya Bangladesh along with Bangladesh Mathematical Olympiad (BdMO) would like to raise awareness of the role of mathematics in shaping the future of our students as well as our beloved nation.
